

## **\*Installation of the Redi Vent by STUDOR in a Dual Drain Washing Machine Outlet Box**

### General:

- The Redi-Vent™ can be installed with any dual drain Water-Tite Washing machine box

### Location:

- The Redi-Vent™ can be installed on either the right or left hand side of the Water-Tite dual drain box.

### Installation:

- The Redi-Vent™ can connect to 1 ½” or 2” Pipe
- The valve should be connected to the piping system in accordance with local Plumbing codes.

### IPC 2003 Edition section 406.3

The waste from an automatic clothes washer shall discharge through an air break into a standpipe in accordance with section 802.4 or into a laundry sink. The trap and fixture drain for an automatic clothes washer standpipe shall be a minimum of 2 inches in diameter. The automatic clothes washer fixture drain shall connect to a branch drain or drainage stack a minimum of 3 inches in diameter.

### Features:

- The adaptor assures a no leak connection at the box to prevent leaks that could turn into a mold issue
- Saves time and money by minimizing and eliminating the installation of extensive vent piping.
- One box and the Redi-Vent™ is all you need.
